Preface

Whoever was the first low cost airline and, thus, the pioneer of the low cost idea – the Pacific Southwest Airline (PSA), Southwest Airlines or Laker Airways – this business idea has revolutionized the international flight market, and, with the appearance of Ryanair in 1985 and a multitude of follow-up airlines, the business model was also established in Europe and has become part and parcel of today’s (European) flight market. Ever since then, the subject of “low cost airlines” has been largely analyzed and controversially discussed in the press and among economists and scientists.

Our book “Low Cost Airlines in Europa – eine marktorientierte Betrachtung von Billigfliegern” (Low Cost Airlines in Europe – a market-orientated study on no frills carriers) published in 2005 has met with great approval from research and practice, so that its first edition was quickly out of print. Consequently, we had to ask ourselves the question whether we should allow for the quick changes in the air traffic industry by preparing a revised edition. However, through several discussions and meetings with cooperation partners and business friends (a special acknowledgement in this respect is due to Thomas Büermann), the idea of publishing a more comprehensive handbook came about, with not only two authors taking the floor, but including the views of several experts from the field of research and (of particular importance for us) practice. In order to cover the numerous aspects of the low cost airline issue, it was our aim to not only integrate articles written from the low cost airlines’ point of view, but also provided by cooperation partners and competitors. With the desire of not limiting the impact of our digest to the German-language market while accounting for the general practice used within the “airline branch”, the present publication was written in English.

For this reason, we would like to extend our gratitude to all authors for their contributions to the success of this handbook. Our thanks go in particular to the field professionals for giving readers an insight into their companies and philosophies and for taking time off from their daily business to write an article for this handbook.

We also owe big thanks to our publisher, Dr. Joachim Schmidt, for showing great interest in the topic right from the start and for supporting us at all times with help and advice. Furthermore, we would like to thank the publisher of our first publication on the low cost airline subject, Prof. Dr. Walter Freyer, for encouraging us to produce another publication. Another particular thank you goes to our language advisors Kate Otter and Klaus-Dieter Bosse.

Finally, we would like to thank our families for providing us with the necessary support to compile this handbook.

Dresden and Wernigerode, April 2007 Sven Groß and Alexander Schröder
# Table of Contents

*Preface* ........................................................................................................................................................................ 5

**Part 1: The Low Cost Strategy from the Airlines’ Perspective**

*Borislav Bjelicic*

*Sven Groß and Alexander Schröder*
Basic Business Model of European Low Cost Airlines – An Analysis
of Typical Characteristics ................................................................................................................................. 31

*Katja Bley and Thomas Büermann*
Business Processes and IT Solutions in the Low Fare Environment ................. 51

*Andreas Knorr*
Southwest Airlines: The Low Cost Pioneer at 35 ............................................. 77

*Bertolt Martin Flick*
Air Baltic – The Dynamic Airline Markets in the Eastern Parts of the
European Community ............................................................................................................................. 111

*Ralf Teckentrup*
Low Cost Airlines from a Charter Perspective – Analysis of Strategic
Options for Charter Airlines and Positioning of Condor .................................. 123

**Part 2: Demanders of Low Cost Products and their Impact**

*Birgit Zandke-Schaffhäuser*
No Frills – No Rights? Unfair Conditions of Carriage of Low Cost Airlines .... 133

*Achim Schröder*
Time-spatial Systems in Tourism under the Influence of Low Cost Carriers .... 155

*Torsten Widmann*
The Contribution of Low Cost Carriers to Incoming Tourism as exemplified
by Frankfurt-Hahn Airport and the Rhineland Palatinate Destination of the
Moselle Region ................................................................................................................................. 171

*Regine Gerike*
Ecological and Economical Impacts of Low Cost Airlines .............................. 185
Part 3: The Low Cost Strategy from the Cooperation Partners’ and Competitors’ Perspective

Michael Hupe
The Impact of Low Cost Airlines on Dresden Airport and its Service Area ...... 219

Maria Horbert
Airports in the Process of Change – A Con-temporary Business Model in a Low Cost Age ...................................................................................................................... 239

Alexander Schröder and Sven Groß
Low Cost Airlines and Coach Tourism – Threats and Opportunities for German Tour Operators ............................................................................................................. 249

Eva Groeneveld-Deussen
Low Cost Carriers and Railway – Competition or Cooperation? Practical Examples based on a Theoretical Approach of Competitive Strategies ...................... 263

Sven Groß, Jobst Grotrian and Roger Sonderegger
Transferring the Low Cost Strategy to Ship, Bus and Rental Car Companies ... 293

List of Authors .................................................................................................................. 315
